Commitment to impartiality

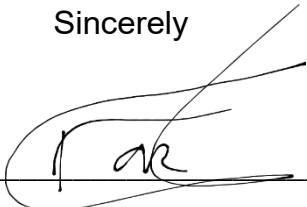

CERTIMEX has defined the commitment of Top Management impartiality.

Guarantee to producers, processors, marketers and consumers the performance of inspection and certification activities for ecological (organic) products and processes, USDA-NOP, JAS, LPO-ALOA, CERTIMEX, Agroecological standard for Soil Conservation of Mexico City NACDMX-002-RNAT-2019 and general SPP rules and regulations for sustainable products and processes of agreement to national and international norms, regulations, and national and international laws, with competence, independence and impartiality.

Develop a quality system, for inspection and certification that is appropriate to the national context but equivalent to international requirements.

Develop a national certification system that is economically available to stakeholders, but also allows CERTIMEX to obtain the necessary income to ensure the continuity and independence of its work.

Sincerely

A handwritten signature in black ink, appearing to read 'Taurino', is written over a horizontal line. The signature is stylized and includes a large loop on the left side.

Ing. Taurino Reyes Santiago

Executive Director
